Work Report - Vessel & Pet Rendering Fix

Date: 2026-07-03 | Branch: main | Commit: fix: correct player-relative vessel and pet rendering

SUMMARY

Fixed vessel and pet rendering so the vessel displays as the main player visual (on top of the player sprite) and all four pet types use exact player-relative offsets specified by the designer.

FILES CHANGED (4)

File	Change
index.html	Cache-bust: ?v=20260703999000 -> ?v=20260703999100
js/main.js	Cache-bust: ?v=20260703999000 -> ?v=20260703999100
js/game/Game.js	Vessel draw order swap + pet offsets + PetCatalog cache-bust
js/game/PetCatalog.js	Firewall Sentinel orbitRadius: 82 -> 56

EXACT FUNCTIONS CHANGED

Game.js - Draw Order (~line 9911)

BEFORE: vessel -> glow -> player -> pets (vessel hidden behind player)
AFTER: glow -> player -> vessel -> pets (vessel on top as main visual)

Game.js - _tickPetAttack() : Byte-Mite

BEFORE: offX = idx===0 ? 52 : -52; targetY = py - 36
AFTER: targetX = px - 38; targetY = py - 24

Game.js - _tickPetUtility() : Data Miner Drone

BEFORE: offX = idx===0 ? -56 : 56; targetY = py - 26
AFTER: targetX = px + 42; targetY = py + 18

Game.js - _tickPetControl() : Error-Code Bomber

BEFORE: offX = idx===0 ? 48 : -48; targetY = py + 26
AFTER: targetX = px - 46; targetY = py + 22

PetCatalog.js - Firewall Sentinel

BEFORE: orbitRadius: 82
AFTER: orbitRadius: 56 (tight 48-64 range)

VALIDATION CHECKLIST

Check	Result
Syntax check: Game.js	PASS
Syntax check: PetCatalog.js	PASS
Syntax check: main.js	PASS

Live site boots (no black screen)	PASS
Cache-bust updated (999000 -> 999100)	YES
Black screen regression	NO
Gameplay behavior changed	YES (vessel + pet fix)
Unrelated files touched	NO
Pushed to origin/main	YES
origin/main synced	YES
